U.S. Patent and Trademark Office PTOL-303 (Rev. 04-01)

Continuation of 5. does NOT place the application in condition for allowance because: the examiner maintains that McConnell reference '495 discloses rollers 5 forming a friction nip between them, see Fig. 2, while the primary reference discloses the claimed first and second series of elongated protuberances (Figs. 2 and 4; via 36 and 37). That make it obvious to replace Tipper's pleating apparatus with the use of rollers as disclosed in McConnell, in order to make the feeding and drawing of the web through the machine easier and smoother.
